Engagements du pilote XC « GAA » :

En tant que pilote XC - GAA :

- Je suis pilote certifié « GAA » ayant suivi la formation relative aux règles et usages spécifiques des « GAA ». Je dispose donc du brevet « GAA » N°
- Je dispose d'un dispositif de live tracking qui permet à toute personne de m'identifier lorsque je suis en vol. J'utilise le système le Livetracking suivant:

- o Flymaster
- o Xcontest

Identifiant :

Depuis le:

- Je dispose d'une radio me permettant de rester en veille sur la fréquence de St Hubert et je m'engage à assurer une veille sur cette fréquence tout au long du vol lorsque je suis amené à entrer dans une GAA active.
- Je dispose de l'app EBSH Tower et je m'engage à l'utiliser lors de mes vols lorsque je suis amené à entrer dans une GAA active.

- Je m'engage à mettre tout en œuvre, dans la mesure où la sécurité du pilote ou d'autrui n'est pas menacée, pour voler en toute légalité.

Ceci comprend :

- o Une préparation adéquate du vol (AIP + NOTAM, conditions météos, connaissances des espaces aériens à proximité de la zone d'évolution, etc.)
- o Une adaptation du vol effectué en fonction des conditions réelles rencontrées
- Je m'engage à voler avec un système de Livetracking public à tout moment, y compris lorsque je n'évolue pas dans une zone GAA.

Ceci dans le but de :

- o Optimiser la sécurité du vol et la sécurité
- o Rentrer dans le cadre d'une collaboration multidisciplinaire
- o Servir d'exemples pour les autres pilotes
- o Eviter les infractions.

J'ai bien pris conscience que le fait de voler sans Livetracking actif m'expose à la déchéance de mon brevet XC – GAA.

La sécurité est l'affaire de tous et dans l'aviation celle-ci s'est construite sur l'expérience et le partage d'informations. Il n'y a donc pas, derrière les requis cités ici avant, de volonté ou souhait répressif, mais bien un partage d'informations au bénéfice de tous

1 General

The Glider Areas Ardennes aims at replacing temporarily the MILFAG areas 11, 12, 13, 14, 15, 16 as defined in AIP Belgium & Luxembourg ENR 5.5.

The Glider Areas Ardennes is on test from 15 MAR 2021 till 15 OCT 2021.

The MILFAG areas 11, 12, 13, 14, 15, 16 shall not be activated during the validity of this AIP SUP.

All terms and details as described in the LoAs between Belgian Air Component and Centre National de Vol à Voile (CNVV) and VZW Belgian Air Cadets (BAC) (Ref COA – LoA 52); and between Belgian Air Component and Royal Verviers Aviation ASBL (Ref COA – LoA 74) remain in effect if not modified by this AIP SUP.

How GAA work?

The Glider Areas Ardennes (GAA), like the LFA-G, are specific **extension of the G class** airspace.

Differing from the usual non-controlled airspace, few specific rules to take into account.

3 different areas:

- **GA Saint-Hubert**
- **GA La Roche**
- **GA Malmedy.**

GA – Saint-Hubert

- From 4500ft ^{QNH} to **FL65** (included)
- Can be expanded to **FL75** or **FL95** on EBSH request (if Mil agree)

- When **Mil active (often)** :

- TRANSPONDER REQUIRED
- **Prohibited for all paragliders**

- When **MIL not active** (usually small slot during the day)

- TRANSPONDER NOT REQUIRED
- **Allowed for GAA-XC paragliders**

GAA commitment!

- While flying across the GAA-SH , LR or MA, the GAA-XC pilot must listen to EBSH radio frequency and have an eye on EBSH-Tower app notifications in case Mil takes the area back. (**it happens!**)
- **EBSH frequency is: 122.180 MHz**
- **Check EBSH-Tower app message confirmation (see below)**
- One pilot CANNOT monitor EBSH radio for other pilots !
- You need a special AM monitoring radio (no need to be able to speak)
- Use Livetracking (Flymaster or XCTrack/Xcontest) for all flights

Send message to all GAA-XC pilots

The screenshot shows a web-based application interface for managing pilot status and sending messages. At the top, there is a navigation bar with links: Update Golf Status, Send Message, Golf Status Log, Message Log, Members, and Contact. Below the navigation bar, a large heading reads "Send Message to all pilots with EBSH Tower APP". A text input field is present, though its content is not clearly legible. Below the input field are two buttons: a blue "Send Message" button and a smaller button labeled "Request Confirmation" which is circled in red.

Briefing for today 7 May: sorry, a bit late...

A little reminder: as a rule of thumb, stay below 4500FT (1371m) AMSL during weekdays.

- TSA 26A and TSA 26B active today. (is above 4500ft but this usually says that there is military activity - see bullet point below)
- And with the above, EBD 26 activated in the same window. (this is a danger zone and we are allowed to fly in, but it is possible that you come across an F16)
- EBR04 Elsenborn active for the rest of the week (and we automatically activate the adjacent EDR117 zone in Germany) (this is a zone where it is forbidden to fly in)

Validated airspace files can be found:

- *in the FAT tool*
- *on the FAT Google drive*
- *on airspace.xcontest.org*
- *in the XCTrack application (airspace visible with activation windows)*

Visualize the airspace and prepare your flight on the same FAT tool.

BPC : « Online Challenge » throughout the year

The « carrot » 100% airspace valid

- March → September
- Need to pass through waypoints to guide pilots
- Flight = 100% Airspace valid

FAT + BCP: let the pilot learn from errors

Livetracking & GAA

- Flymaster and/or XCTrack/Xcontest: the 2 main platforms
- Already using Livetracking to get GAA-XC certificate. Why?
 - > Pilots using Livetracking are pilots that are following the rules (the opposite is not true /!\))
- Use Livetracking for GAA flights and for the other flights
- This is a GAA Charter commitment

XC Reminder – Altimetry: 3 different altitudes

- **QNH** : Barometric altitude based on the MSL pressure (hPa) in a specific place. Right altitude if correctly set.
- **FL (QNE)**: Barometric altitude provided by the pressure altitude based on 1013,25 hPa. Unless the QNH is 1013.25 hPa, this Standard altitude is not the same as the altitude based on QNH
 - Air to Air separation
- **GPS** : Satellite-based altitude with 3D error quite high depending on the devices and places

XC Reminder – Altimetry

- **Local QNH :**

Is the one used for the entire country in non-controlled airspace.

It can change at any moment.

- In Belgium we switch from QNH to FL above 4500ft QNH (± 1372 m)

XC Reminder – Airspace

- The sky is classified from **Alpha** to **Golf**, alpha being the most restrictive and Golf the less.

XC Reminder – Airspace

- *Particular Segments :*
 - **TRA:** Temporary Reserved Area
Reserved zone for special uses (most of the time forbidden for paragliders)
 - **TSA:** Temporary Segregated Area
Divided zone for special uses or civilian/military optimization
(most of the time forbidden for paragliders)
 - **LFA:** Low Flying Area
Low altitude training area or extended non-controlled airspace (**LFA-G**)
 - **HTA:** Helicopter Training Area
Low altitude helicopter training area

XC Reminder – Airspace

- *Special Zones :*

- **D:** Danger

Zone with potential dangers for crossing aircraft (keep sharp lookout!)

- **R:** Restricted

Zone with conditional access (most of the time forbidden for paragliders)

- **P:** Prohibited

Forbidden access zone!

- **TMZ:** Transponder Mandatory Zone (forbidden for paragliders)
- **RMZ:** Radio Mandatory Zone (forbidden for paragliders)
- **ATZ:** Airfield Traffic Zone (forbidden* for paragliders)

* See AIP for each zones

XC Reminder – Airspace : LFA Golf

- Those are extended golf class airspace allocated by Skeyes to the glider community above 4500 ft^{QNH} when Mil is not active
- Higher limit is a « FL excluded ». This means we are not supposed to fly at that Flight Level.
 - **G1:** 4500ft^{QNH} – FL55 Excl. When MIL is not active
 - **G2:** FL55 – FL 75 Excl. When Gliders are requesting it
 - **G3:** FL55 – FL65 Excl.
 - **G5:** FL75 – FL90 Excl.

QUESTIONS & ANSWERS

Questions GAA-XC certificate

The candidate is supposed to use a computer with internet access. The goal is to check that the pilot is able to prepare his flight, is able to find the info, understand the info and have the right info in mind while flying.

Questions can be shared before the training/exams, so that the pilot can be better prepared. New scenarios (notams) will be used for each exam

Examen GAA-XC 04/09/2021

Date: Nom du pilote:

- Numéro brevet XC:
- Utilisation du Livetracking pour tous mes vols:
DepuisType: Flymaster – Xcontest/Xctrack
Identifiant:
- Utilisaation d'une radio capable d'écouter la tour
EBSH (122,18Mhz)

Questions GAA/NOTAMS. Vol 01/09

- Quelles GAA permettant de voler en parapente sont actives et quels sont les créneaux horaires (LT) respectifs de ces zones.?

- Pour chaque site repris ci-dessous, puis-je accomplir (vol entier ou partiel) un vol de 40km en pouvant monter au moins une fois à une altitude de 1800 m AMSL. Prendre en compte une variation possible de 30° par rapport au cap annoncé ?
(Ne prenez pas que les GAA en compte)
 - Pour chaque site permettant d'atteindre cette altitude au moins une fois, indiquer le créneau horaire à respecter pour pouvoir monter à cette altitude de 1800m AMSL.
 - Préciser si il est possible de maintenir 1800m AMSL durant tout le vol, Si non, indiquer les kms approximatifs durant lesquels cela est possible (De x Km à y km).
 - Donner le noms des zones rencontrées dans un angle de 30° dans le sens du cap donné qui doivent être prises en compte.

A grayscale landscape photograph showing a range of mountains. The peaks in the background are heavily covered in snow, while the lower slopes and a prominent ridge in the foreground appear to be rocky or have sparse vegetation. A dense forest of coniferous trees covers the base of one of the lower ridges. The lighting suggests either early morning or late afternoon, casting long shadows and giving the scene a dramatic, monochromatic feel.

The End....
